

STEP INTO THE LIGHT

Lyrics: Jérôme Musiani, Vince McClenny and Gérard Mourou

INTRO

You know, it's funny how it all goes down...
When I think of how we're living down here on this ground...
I mean, for real for real, I just can't understand it,
This is the Mother Planet...
Just take a step up!
Cause we are the light!

VERSE 1

2015 the International Year of the Light and Light-based Technologies
Come on, step into the light!
Because everyone that knows about this is right here with us today
Come on, step into the light!
Each one teach one, we gonna be alright
With every man, woman and child screaming, "I am the light!"

Thanks to people like Albert Einstein,
Charles Kao, Thomas Edison,
And don't forget Galileo!

Light pollution on our planet...
It's time we understand it!
Light can teach, light can heal,
Light powers all our ideas
Light is love (X2)
And love is our light
Light gives life to all our dreams
To all our dreams...
Because we lose in the dark
Step into the light!

VERSE 2

This education is important for our health and our future
We need to change our ways
We gotta open our minds and keep an open mind
Without light there would be no life
We gotta be more careful about what we teach our sons and daughters
Wake up people! Because the darkness is upon us
Step into the light!
